

TRIUMPH REVIEW

Detroit Triumph Sportscar Club

OFFICIAL PUBLICATION

www.detroittriumph.org

The Detroit Triumph Sportscar Club is joining with the Canadian Legion, Post 84, to help The Haven this holiday season. The Haven is Oakland County's only 24-hour emergency shelter dedicated to assisting female victims of domestic violence or sexual assault and their children. In most cases, victims and their children arrive with only the clothing on their backs. Please, let's help them build a little hope with our contributions.

Emergency shelter needs include paper towel and toilet paper, napkins, alarm clocks, twin and full sheet sets, diapers and baby wipes, juices, baby food and powdered formula, canisters of kool-aid and other drink mixes.

Please bring your donation to the December member meeting or drop it off at the Canadian Legion any time.

Thank you!

May everyone have a safe and joyous holiday season!

DECEMBER EVENTS:

- 9:** Member Meeting, Royal Oak

DTSC'ers Too Fast, Too Furious

Fun Event Nets \$615 for Macomb County Food Bank

Once again, lots of DTSC members and families enjoyed some great racing action at DTSC's 2003 Kart Race. The day was very exciting as both men and women put the pedal to the metal out on the track. Several members also drove their LBCs to the Kart 2 Kart facility in Sterling Heights. All were pleased to greet Geof Bush & Lori Day in their Spitfire, Dave & Laurie Carlson in the TR3, Roger Cotting in his recently finished TR8, Blake Discher and the TR6, Dave & Maureen Jonker in Dave's beautiful Old English White MGA, Brian & Connie Sims in the TVR, and, of course, our illustrious host, Mike Bilyk in his red TR4. These lucky members were able to get in some driving practice on the way to the track as well as out on the track. Luckily, the weather was warm and dry, even though overcast, and it was nice to see the cars out for possibly the last time this year.

This year DTSC men were separated into four weight classes, while the women split into two groups in the effort to win an award ribbon and bragging rights for the upcoming year. All the "old timers" with previous kart experience showed their stuff with some very fast lap times, while the novice drivers demonstrated just how quick they could learn the ropes. The competition was hot and heavy (well, not really!) as the groups got out on the track for practice. The "Hermannator" Schaller was looking especially threatening in his all-black driving suit as he declared, "I'll be back!" and jumped into his kart.

Continued on page 2

Above: Dave "Speedy" Snyder, left, attempts to overtake Terry "Eat My Dust" Walters in one of the practice rounds at the Kart-2-Kart track on Sunday, November 23rd.

Kart-2-Kart Races Thrill Many

From page 1

The DTSC drivers were divided into four groups for practice and qualifying, with two men's, one ladies and one mixed group taking their laps together. Once each group had finished both prac-

CLUB EVENT RECAP

By Sue Snyder

tice and qualifying runs, the Kart 2 Kart "officials" regrouped drivers into four new "race" squads based on average times in qualifying. The final race session started with drivers in each of these groups lined up in the starting grid, similar to a grand

Clockwise from top right: Bob Osen on his way to a fastest time of 30.18. Dan Campana prepares to drop the wind screen on his helmet. A corner worker assists Dave Carlson after Dave spun going into a turn. Cheryl Vincent, in car number 11, rounds a hairpin turn.

prix start. Although Kart 2 Kart officials used the final position after the "race" to rank drivers, the DTSC "officials" elected to use each driver's best lap time of the day to determine final standings. DTSC also decided to use the best lap time from the first two sessions (practice & qualifying) to rank drivers in their classes for awards. Once again this year, Bob Osen ran the men's best time of day with a 30.18 lap, while Connie Sims again dominated the women with a 31.33.

Once all groups had finished the "race" session, most of the DTSC group headed over to downtown Rochester and the Rochester Mills Brewing Company.

Once everyone had settled in, there was lots of discussion and many could relive the earlier excitement. Awards were presented to the top drivers in each class and a fine dinner was enjoyed by all. The biggest winner this day was the Macomb County Food Bank, which will receive a check in the amount of \$615.00 from the Club. Of course, this would not be possible without the generosity of our race sponsor, Mike Bilyk. Thanks Mike, for again sponsoring the DTSC and its members in a fine event. We couldn't do it without you.

Racing Results

BEST LAP OF DAY:

(Alphabetically)
 Mike Bilyk - 31.50
 Geof Bush - 31.37
 Nathan Bush - 31.89
 Dan Campana - 31.44
 Dave Carlson - 32.14
 Dave Cohee - 31.79
 Doug Cook - 32.76
 John Corriveau - 32.17
 Roger Cotting - 32.00
 Lori Day - 33.24
 Julie Derikx - 32.26
 Blake Discher - 32.53
 Bonnie Holas - 31.60
 Steve Holas - 31.60
 Dave Jonker - 31.56
 Maureen Jonker - 33.26
 Wayne Larose - 31.63
 Bob Lesage - 31.16
 Jamye Meyer - 34.57
 Jeff Meyer - 31.50
 Mark Olexa - 32.06
 Nick Olexa - 31.63
 Bob Osen - 30.18
 Karen Osen - 32.08
 Bob Owsinski - 32.37
 Mary Owsinski - 33.23
 Ken Pardonnet - 33.00
 Hermann Schaller - 31.48
 Jeri Schaller - 33.20
 Alan Sheets - 30.83
 Brian Sims - 31.50
 Connie Sims - 31.13
 Dave Snyder - 32.74
 Sue Snyder - 31.73
 Meagan Trimble - 34.66
 Cheryl Vincent - 31.74
 Tony Vincent - 31.26
 Heather Walters - 31.27
 Terry Walters - 32.40
 Kathy Zachel - 34.71

Contemplating a Positive to Negative Ground Conversion?

There comes a point in the life of a purist when the convenience of maintenance and accessory management takes over. There will always be a continued debate over the physics of electron flow, electron hole theory and various other aspects involving the direction of sub-

TECHNICAL INFORMATION

By Joe Pawlak,
Illinois Sports Owners Assn.

atomic particles in your early Triumph. (I knew a Electrical Engineering degree would come in handy some day.) The fact of the matter is that switching from a positive ground system to a negative ground system is easy and should be considered as a short winter project. Two big reasons to consider this a "to do" project are:

1) Easy addition of reliability enhancements such as electronic ignition, electric fuel pump etc., and,

2) The ability to add a decent radio/CD/tape deck to your car without going through a major exercise in isolating the audio device from the car chassis.

If you must keep the illusion that the car remains a positive ground, then keep the Red battery cable hooked up to the negative ground terminal of the battery. Just don't let anybody "jump" start your car.

The steps to complete the project are as follows:

1. Disconnect the battery cables and remove the battery

2. If you have a original radio, remove it. Hopefully you are not replacing it with one of those 8 track units.

3. If you have a ammeter, you'll need to reverse the wires connected to it unless you want to remember that when the needle goes negative you are charging and when it goes positive you are discharging. Reversing the leads is much easier.

4. Diodes Schmiodes. Some distributors may have a diode across the points rather than a condensor, reverse the connections to the diode. Also some electric fuel pumps (if you have one) may have a diode going across them as well. If unsure,

there may need to be further discussions needed about your electrics. (How about a electrics clinic?)

5. Flip flop the wires going to the coil. Leave the big fat one in the middle alone. So you'll be connecting the (-) side of the coil to the wire going to the distributor and the (+) side of the coil to the wire going to the ignition switch.

6. Flip flop the wires going to the heater fan motor. If you don't, the fan motor will rotate backwards. If it's a centrifugal (squirrel cage) fan, you'll only have around 40% flow into the car. If it's an axial (bladed) fan, it will suck air out of the car instead of blowing air in. Either way, you'll be colder than you want to be. (It is not necessary to change the leads at the starter motor. The starter uses a series-wound motor that will always rotate the correct way with either polarity.) Some Triumph owners have installed an auxiliary electric radiator fan. If your car has one, you'll need to flip flop these leads. If you don't, this fan will attempt to blow air in the opposite direction of the engine driven fan. This will cause an overheating problem.

7. Replace the battery. This time you'll be rotating it 180 degrees so that the negative battery terminal is connecting to the cable strap that attaches directly to the body/chassis.

8. Disconnect the two leads to the generator. Temporarily connect one end of a length of wire to the positive terminal of the battery. Touch the other end of the wire to the F terminal on the generator (the one the smaller lead is connected to, the wire is brown with a green stripe) several times briefly. You'll get a few sparks and thats ok unless you have a natural gas leak happening. This repolarizes the field windings so you get the proper output.

8. Reconnect the two leads to the generator.

That's it! All you need to do now is call Tim or Joe to help fix the other electricals (just kiddin'). Everything electrical on the

Mike Bilyk's VTR Autocross Record

While sitting around one day, waiting for the snow to melt I decided to research my autocross results for the 26 VTR Conventions I have attended. Having raced in 18 of the 26 autocrosses, I have never encountered any mechanical breakdowns, just a few mental ones. The 1982 Convention resulted in suspension failure while towing to the event and a replacement part was not available.

DTSC Pinewood Derby

Sunday, February 15, 2004 at 1:00pm
Royal Canadian Legion
Eleven Mile Road, Royal Oak

The contest consists of designing and building a small wooden racecar from a kit that meets certain prescribed criteria and specifications. The derby is run in heats to determine fastest cars with the cars starting by gravity from a standstill on a track and run down an inclined ramp to a finish line, unaided.

PLEASE READ CAREFULLY - CLASSIFICATIONS HAVE BEEN MODIFIED

Design. The intent of the Organisers and the Club is for cars to be purpose built for this event and that the shape, color, accessories, decals, etc. should be that of a British marque or model. It is further intended that new cars be designed, constructed and entered in this year's event.

Competition Classes and Awards. Races will be held and awards given in the following three (3) categories: 1) Men's Division - new entries, 2) Women's Division - new entries, and 3) Vintage Division (cars entered in one of the prior DTSC Pinewood Derbys and/or classic Pinewood Derby cars from your first childhood). Additionally, Best In Show Awards will be presented to the best and/or most authentic Triumph and other British marque as judged by the Event Organisers. Men's and Women's Divisions entrants only (new cars for 2004) will be eligible for the Best in Show Awards. Note: Entrants in the Men's and Women's Divisions will also be allowed one additional entry in the Vintage Division.

Registration/Inspection. Registration and scrutineering will occur on the day of the event, for the hour immediately preceding the races. Each car must pass weigh-in and inspection by the Official Inspection Committee before it will be allowed to compete. If at registration a car does not pass inspection, the owner will be given 10 minutes in which to make the necessary adjustments. No adjustments or modifications will be allowed on any car after it passes inspection unless the car is damaged in handling or in a race.

Kits/Material. For most, it is highly recommended that the Official Grand Prix Pinewood Derby Kit be purchased which includes the correct axles and wheels as well as the basic wooden body to facilitate building your model and meeting the race specifications. They are available at many local hobby/sporting goods stores that handle Scouting materials for about \$4.00.

Entrance Fees/Costs. A \$5.00/entrant fee to help cover the costs of trophies and awards for the Derby will be assessed to those who participate in one of the three Divisions noted above and purchase their own Kit or materials. The cost per entrant will be \$10.00 if you would like the Organisers to provide you with the basic Kit noted above as well. No additional fees will be charged to also enter a vehicle in the Vintage Division for those registered in the Men's and Women's Division. The Club will provide a light afternoon meal as part of the entry fee, however, all beverages must be purchased from the Legion on your own.

Vehicle Specifications:

Width. The overall width of the car shall not exceed 2 3/4 inches.

Length. The overall length of the car shall not exceed 7 inches.

Clearance. A minimum of 3/8" clearance to underside of body must be maintained in order to clear track lane strip.

Weight. The weight of the car shall not exceed 5 ounces as determined by the "official" scale. No loose materials of any kind (such as lead shot) are permitted in the car. The car may be hollowed out and built up to the maximum weight (Kit weighs substantially less than 5 ozs.) provided the additional material is securely built into the body, not taped on for example.

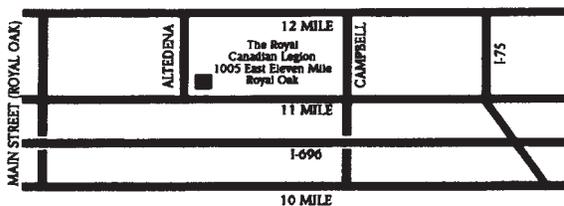

Wheels. Only the Official BSA/Cub Scout Grand Prix Pinewood Derby wheels and axles are permitted. Wheels may be sanded slightly to remove any imperfections, but the treads must be left flat. Burrs and other minor imperfections in the axles may likewise be removed with a fine emery cloth, etc. Wheel bearings, washers and bushings, etc. are prohibited.

Springing. The car shall not ride on any type of springs or suspension. The car must be freewheeling with no starting device.

Details. Details and accessories such as steering wheel, driver, motor, windscreen, etc. are permissible as long as they do not exceed the maximum width, length and weights.

Additional information regarding logistics, conduct of the race, heats, etc. will be provided on race day. Any questions/concerns with these specifications or other event issues should be referred to the Organisers, Brian Sims at (248-814-8441, simscl@ameritech.net) or Terry Walters at (734-464-8149, twalters@twmi.rr.com).

Being a member of DTSC is fun, owning a Triumph is optional, you can drive whatever you want. Just send your dues of \$30 to our membership chair, Dave Jonker, 22609 Carolina, St. Clair Shores, MI 48080. Your dues help cover the costs associated with this newsletter. **Talk to any club member and join today!**

All members are welcome and encouraged to attend board meetings and regular meetings.

Regular membership meetings of the Detroit Triumph Sportscar Club are held on the second Tuesday of each month. Board meetings are held on the first Tuesday of each month. All meetings begin at 8:00pm at the Royal Canadian Legion, Post 84, 1005 East 11 Mile Road, Royal Oak, Michigan. Please see map above for location details.

Triumph Review is the official publication of the Detroit Triumph Sportscar Club and is published monthly for club members and editors of other British car clubs in the United States and Canada on a reciprocal basis. **The electronic version is available on the first of each month, the printed copy is mailed to arrive before the member meeting of each month.** The editor requests your contribution or submission be made either electronically or in writing by the 20th of the month preceding publication. Classified advertisements are free to members. Mail written materials to DTSC, Newsletter Editor, 1363 East Fisher Freeway, Suite 8, Detroit, MI 48207; electronic submissions should be emailed to review@detroittriumph.org. I will try to make it as easy as possible to get your submission published. Opinions expressed are those of the individual authors and not necessarily those of the club as a whole.

Please visit our website: www.detroittriumph.org.

Ideas for articles relating to club activities or of general interest to Triumph and other British car owners are welcome!

For Sale and Items Wanted

18 Foot Flatbed Car Trailer, dual axle, two mounted tool boxes. This was formerly the Snyder's trailer. \$1,200. 248-426-0124, Dave or Laurie Carlson. (12/03)

TR6 front fenders, (pair - L&R). Still in-the-box British Heritage parts purchased from TRF, not junk from the other side of the other pond. For "early" models but will also easily fit "late". Why weld and patch when you can bolt on perfect fit pieces!? \$400.00 for the pair. Call Terry at 734-464-8149 or email to twalters@twmi.rr.com. (11/03)

FREE: Bare blocks MKII GT6, MKI GT6+ head, crank shaft, exhaust manifold. Two boxes of parts: gauges, coils, rear lens, triple intake manifold (Weber), starters, alternator, etc. Must take all. Moving. Jim 586-296-5787. Roseville. (10/03)
